

## 2016-2017 Graduation Survey

### Analysis of Results

#### **Narrative**

ASU-Beebe students are given the graduation survey link when they apply for Graduation. By capturing the student's perception of their experience, ASU-Beebe is better equipped to understand the student experience and align strategic priorities for the desired outcomes.

#### **Methodology**

Select Survey software is used to capture, collect and present findings from the 2016-2017 Graduation survey. The survey results captured in an overview PDF document are then downloaded into a CVS file for further analyses.

Of note for the 2016-2017 results, the collection of survey results was disrupted in January 2017. This occurred as the institutional Student Information System was changed from POISE to Campus Nexus Student. This change created a disconnect in the survey link.

#### **Findings**

Of the respondents, the majority indicated they were employed full time. 80% of respondents indicated the desire to pursue an additional educational credential or transfer to another school).

Graduates taking the survey indicated faculty were interested in their learning, were pleased with advising, availability, size, location, and quality and scored each of these areas above a **4.5 on a 5 point scale**.

Each service area (Blackboard, Bookstore, Campus Wi-Fi, Campus Connect, Building appearance, safety, career/transfer service, cashier's office, counseling services, disability services, financial aid, food services, intramural sports, learning center, library, parking, residential life, registration, activities, student center, testing services and website) was scored above a **4.25 on a 5 point scale**.

Survey respondents rated their overall experience **4.65 on a five point scale** and are likely to recommend ASU-Beebe (or one of its campuses) to family or friends!

#### **Conclusions**

Survey respondents indicate reinforcement and mastery of student learning outcomes such as communication, critical thinking, mathematical concepts, scientific inquiry, society/self, knowledge acquisition, knowledge application, social awareness and personal responsibility.

Service area ratings range from 4.26 (Campus Wi-Fi availability) to 4.61 (Library).
