IMAGINE YOUR FUTURE

1.) Use Scotch tape or masking tape to affix your template to your pumpkin.

2.) Use a pointed object to make guide dimples through the template and into your pumpkin so that you know where to carve.

3.) Carefully trim out the “mirrored ‘B’s” first, and set them aside in a safe location; you will use these elements again to complete your pumpkin.

4.) Carve out the remaining light blue areas of the design.

5.) Use toothpicks, straightened paper clips, or wire to attach the mirrored “B’s” back in their original locations.
